

Civils & Installation

Road Stud and TM installation

Clearview Traffic Contracting offer a complete site installation service for the full range of Traffic Management Equipment (TME) as well as the most streamlined and cost effective installation of Astucia Road Studs.

Working to the highest standards (MCH1540 for inductive loop installations, Chapter 5 of the Traffic signs

Manual for stud installation) Clearview Traffic Contracting ensure a first class installation every time. As the preferred installer for Golden River and Astucia products, Clearview Traffic Contracting can offer a true "one stop shop" solution to clients meaning a full understanding of the project from conception to completion. This translates into a high quality and cost effective solution for customers.

ROAD STUD INSTALLATION

Clearview Traffic Contracting are the leading installer of Astucia road studs through continued development and investment. Bespoke installation vehicles provide improved productivity and reduced cost in a previously labour and cost intensive field which is reflected in competitive installation rates.

Complemented by a Traffic Management (TM) division, Clearview Traffic Contracting are able to offer a one stop shop for intelligent road studs, assisting from scheme design through to installation and beyond. Clearview Traffic Contracting are seeking accreditation to HASS7 for road stud installation.

TME INSTALLATIONS

Clearview Traffic Contracting are accredited to HASS 8, 9b & 10 for the installation of Traffic Monitoring Equipment.

TRAFFIC MANAGEMENT (TM) DIVISION

The Clearview Traffic Contracting TM division is nationally recognised as one of the leading specialist contractors working in the traffic industry undertaking Traffic Management. Specialising in all areas of traffic control particularly in support of Clearview Traffic Contracting, TME installations and also in Traffic control for RSI's.

REPUTATION, TRAINING AND STAFF

The reputation of Clearview Traffic Contracting has grown

based upon the professional approach adopted and the quality of service given at competitive rates. Using only fully trained staff who are all fully qualified to HASS 12 A, B & D, Clearview Traffic Contracting specialise in 12 A and 12 B work throughout the whole of the United Kingdom. The response team can be contacted 24/7/365 to give unrivalled support from start to finish.

Undertaking all types of traffic management work both static and 'off peak' including: lane closures, convoy systems, road closures, diversions, 24 hour on site maintenance, event signage, rapid response and emergency call out, traffic management design, traffic management working drawings.

Clearview Traffic Contracting support their own TME install and roadside interview work but offer services to any customer with a requirement for professional TM services, with the ability to offer a complete service, from layout design to the booking of road space. Clearview Traffic Contracting makes an ideal partner for all works on the highway.

PERFORMANCE

Traffic Management relies heavily upon the quality and performance of site based operatives and

Clearview Traffic Contracting are incredibly proud of their operative teams. The structured approach towards training and development recognises the importance of every individual. Such is the commitment to training, that Clearview Traffic Contracting ensure all operatives are trained to the highest level possible. Not only does this ensure a technically highly trained work force, it also affords the opportunity for promotion of the Clearview Traffic Group culture towards work and customers.

SITE STAFF

New operatives are immediately enrolled onto the training program, which includes assessment

in accordance with the HASS12. Regular monitoring, both internally and externally as a programme of on-going training is essential. Those with potential can progress, going on to sit the Sector 12 Foreman's Course.

MANAGEMENT

The management structure is also well established. It allows Divisional managers to operate independently in order to benefit from local resources and road network knowledge, whilst enjoying the support and knowledge of a large national company.

Clearview Traffic Contracting provides a complete high quality, comprehensive Traffic Management service at competitive prices.
